

## Brief guide for tuning in television and satellite channels on Samsung TV

Go to **Settings** (sprocket) in the menu section and choose **Broadcasting**, then **Auto tuning**, confirm by pressing **Start**.

1. **Terrestrial broadcast tuning** – Chose **Antenna** in the **Antenna** menu, change the channel type to **Digital** and start the auto tune. *If you have a USB with pre-set up channels, you do not have to wait for the tuning to be finished and you can click on **Stop**.*  
If you do not, wait until all channels are tuned in.
  
2. **Satellite broadcast tuning** – chose **Satellite** in the **Antenna** menu, then choose the following satellites:
  - a. **Astra 19,2 E**
  - b. **Hotbird 13 E**
  - c. **Astra 28,2 E**
  - d. **Astra 23,5 E**

and press **Save**.

Go to **LNB Settings** menu and individually set the **DiSeqC Mode** according to the following guidelines:

- |                        |       |
|------------------------|-------|
| e. <b>Astra 19,2 E</b> | - 4/4 |
| f. <b>Hotbird 13E</b>  | - 3/4 |
| g. <b>Astra 28,2 E</b> | - 2/4 |
| h. <b>Astra 23,5 E</b> | - 1/4 |

and press **Close**.

If you have a USB with pre-set up channels, you do not have to wait for the tuning to be finished and you can click on **Stop**.

### 3. Transferring a sorted channel list from a USB device

Connect the USB disc to the USB outlet located on the back side of the television.

Press the Menu button on the remote, then **Settings – Broadcasting – Expert Settings – Transfer Channel List**, insert PIN **0000**, then choose **Import from USB device**. The list will transfer within a couple of seconds, the TV will automatically restart and after that the transfer is complete and all channels are ready and sorted.

**We wish you have a pleasant viewing experience while watching the TV in Luka Living!**
